education

September 2017 - July 2021

Bachelors Degree

POZNAN UNIVERSITY OF TECHNOLOGY

Computing, Information and Communication Technology

work experience

XrWizards

November 2022 - Present

Senior Fullstack Developer (Node.js + Vue.js)

I work here as one-man army, being responsible for the whole web part of our main product.

- Mazer - the metaverse ecosystem - I provided central backend API for managing all applications & frontend web panel to use some options via UI. The system includes managing spaces, accounts, organisations, blockchain wallets, etc.

Digital Colliers

January 2022 - October 2022

Senior Fullstack Developer (Node.js + Vue.js)

I worked at software house providing services for companies from all over the world. The 2 main project I was included are:

- Winfellas.com - multiplayer experience for online casinos - backend + frontend
- Lotto.com - backoffice tool for creating & managing shops in different legal territories - frontend

Auroria Diamonds

June 2020 - December 2021

Fullstack Developer (Node.js + Vue.js)

I worked at the e-commerce company, where I completed 3 following projects, creating both the backend and frontend of each application:

- Auroria.pl - an e-commerce ecosystem including 2 frontend apps - an admin dashboard and a client website, and 10 backend microservices, such as managing a warehouse, orders, offers, a 3D configurator, customer service, and a blog,
- Luvli.pl - an e-commerce platform for ordering personalized jewelry - a backend and 2 frontend apps - an admin dashboard and a client website
- Ringeo.pl - a comparison tool for engagement rings made by Polish jewelers - a backend and a frontend app

Webwizards

July 2018 - June 2020

Frontend Developer (Vue.js)

I worked 2 years at the agency providing services mainly for the biggest automotive brands in Poland. I made tens of landing pages and frontend for several web apps.

The most noteworthy ones are:

- an internal app to manage sales of Audi cars
- an internal app for managing employees of Volkswagen Group Poland
- an internal system for Volkswagen Group Poland to conduct interactive trainings for car dealers
- Piamarket.sk - an automotive marketplace
- Tikitaka.pl - an app for booking ski trips
- an app to report car damages (+ backend)
